Early Statistics and Early Access Returns 2022-23

Notes of Guidance

Issue Date: 5 December 2022
Reference: SFC/GD/25/2022
Summary: These notes of guidance explain the information to be collected in SFC’s Early Statistics and Early Access Returns for 2022-23

FAQ: Principals of Scotland’s universities, and the general public.

HESA fields relevant to returns and subject areas......................................................... 73
Section 1: Introduction

1. These notes of guidance explain the information to be collected in the Scottish Funding Council’s Early Statistics and Early Access Returns for 2022-23.

2. The Scottish Funding Council (SFC) uses the Early Statistics Return to collect information on students eligible for funding at the higher education institutions funded by SFC. Students eligible for funding are the students whose provision SFC funds through its main formula-based grants. Students eligible for funding are primarily those domiciled in Scotland along with students from the EU outside the UK who started on their courses prior to 2021-22, who are paying ‘Scottish’ fees and are on courses open to any suitably qualified applicant.

3. SFC uses the information collected through the Early Statistics Return to:
   - Monitor overall numbers of students eligible for funding.
   - Monitor use of allocations of funded places.
   - Monitor adherence to the consolidation policies for the controlled and non-controlled subject areas.
   - Inform the recommended intakes and allocations of funded places for the controlled subject areas for the next academic session.

4. SFC uses the Early Access Return to collect information on enrolments from the most deprived areas in Scotland to monitor progress against targets set by the Commission on Widening Access and to monitor progress on Outcome Agreement measures.

Changes to the Early Statistics Return for 2022-23

5. The main changes to the Early Statistics Return for 2022-23 are:
   - There are now two subject categories for the HCP-Med course in table 1 to reflect that 2022-23 is the first year that students will have reached year 3 of the course, which is classified as being clinical studies compared to years 1 and 2 being classified as pre-clinical studies.
   - Prosthetics and orthotics has been classified as a controlled subject for 2022-23. The students starting on this course from 2022-23 onwards are classified as being in a controlled subject area. A new subject area has been added to table 1 to collect the intakes to this course of students eligible for funding and of students eligible for rest of UK student tuition fees. A new table has also been added to collect a breakdown of the total intake to this course by tuition fee status and domicile.
• The intake to Medicine is being collected as headcounts rather than FTEs for comparison with the targets that are set for medical students.

• The field of practice is being collected for the students on four-year nursing and midwifery pre-registration courses as it has previously been for students on three-year courses. This is so that the fields of practice are collected for all nursing and midwifery pre-registration students.

• The use of taught postgraduate funded places for Innovation Centres is being collected again to enable SFC to review the use of these places. Institutions that collaborate in an Innovation Centre should agree amongst themselves which institutions report which students.

Change to the Early Access Return for 2022-23

6. Students who leave their course within two weeks without successfully completing are to be excluded from the population used for the Early Access Return. This is to bring the population into line with that used for the Outcome Agreement measure and to match the requirement of reporting students in the HESA Student return.
Section 2: Contact and Return Date

7. Institutions should complete and return the spreadsheet containing their Early Statistics and Early Access returns to HEdatareturns@sfc.ac.uk by Monday 19 December 2022.

8. If institutions have any difficulties meeting this deadline, they should contact SFC, at the email address in the previous paragraph, as soon as possible.

9. Any questions or issues relating to the Early Statistics Return or Early Access Return should also be emailed to HEdatareturns@sfc.ac.uk.

10. Institutions should inform SFC as soon as possible about any:
   - Requests to change recording of exchange students from ‘in’ to ‘out’ or vice versa see paragraphs 198 and 199.
   - Requests to use non-standard FTE conversion factors not already agreed in previous years, see paragraphs 258 to 261.
   - Requests for agreement to include students on optional years abroad see paragraphs 243 and 244.
   - Courses about which they are uncertain as to whether the tuition fees are at full cost-recovery level, see paragraph 30.
Section 3: General Points

Coverage of the Early Statistics Return

11. The Early Statistics Return covers the categories of students and teaching provision that SFC funds through its main formula-based grants. In these notes, the word ‘course’ refers to a programme of study, e.g. ‘a full-time Honours degree course takes four years’. It does not refer to a part of a programme of study, e.g. not as in: ‘science students often take a course in computing in first year’.

12. Whether or not a student should be counted in the Early Statistics Return depends upon both the characteristics of the student and of the student’s course. Section 6 explains which combinations of type of student and type of course to include in the return. Sections 7 to 9 detail how to classify and count the students included in the return, and how to deal with special cases where some students who otherwise satisfy the general criteria for inclusion should be excluded from the return.

13. Institutions completing the return must read the guidance notes in their entirety. For more general readers section 6 contains a flowchart and bullet list that summarise the criteria to be eligible for funding. This gives a general guide to the eligibility criteria, but please note that, in particular cases, some students who satisfy these criteria may still be excluded from the return due to the rules governing different modes of provision (see Section 6), and the guidance on the Autumn count and forecast enrolments later in the session (see paragraphs 51 to 63).

Checking of the Early Statistics Returns

14. Institutions should read these notes of guidance before extracting any information from source records and completing the returns. Since SFC uses this information to inform and to monitor use of allocations of funding, it is important that this information is accurate.

15. Institutions should keep the worksheets and material, such as copies of computer programs and output, used in preparing their returns. Institutions should also prepare and keep a clear note of the methods and calculations used for:

- Estimating the FTE numbers of students expected to enrol later in the session, see paragraphs 59 to 63.

- Determining the FTE numbers of students with non-standard FTE conversion factors, see paragraphs 258 to 261.

16. SFC will carry out checks on the information returned in the HESA Student returns to look for misclassification of the eligibility for funding status of students and for errors in the FTE returned.
Courses provided in collaboration with other institutions or colleges

17. Where an institution collaborates in the provision of a course with other institutions or colleges, all of the institutions involved must count the student numbers on an agreed basis. This includes the taught postgraduate students at the Innovation Centres whose places are supported through SFC funding, see paragraphs 151 and 152.

18. Institutions should check with their collaborating partners that they are returning data on students on collaborative courses on the agreed basis, and that there is no double-counting or omission of student FTE numbers. All students included should meet the criteria for eligibility set out in this guidance.

19. Forms of collaborative provision with other institutions or colleges can generally be classified into one of four categories:
   - Sub-contracting.
   - Franchised courses.
   - Articulated courses.
   - Joint courses.

20. Eligibility for funding varies depending on the category of the course, but the basic assumption is that funding follows the physical location of the students. One exception to this is that the students whose places are supported by the additional funded places that SFC provided for articulation should be counted in the Early Statistics Return even though they will be studying at a college for the first one or two years of their degree courses.

21. Category definitions and whether students on these courses should be included in the Early Statistics Return are set out below.

Sub-contracting

22. Sub-contracting is where one institution sub-contracts the teaching of a minor part of any course year to another institution. A common form of this is where colleges provide skills appreciation or training for students on courses provided by Higher Education institutions (HEIs). Colleges usually charge HEIs for the services provided and will often compete with private training providers for this work. The funding assumption is that the service is provided by the college on a full cost recovery basis. The HEI running the course should include the students in their Early Statistics return. For the less common case, where a college sub-contracts a minor part of a course to the HEI, the HEI should not include these students in their Early Statistics return.
Franchised courses

23. Franchising arrangements generally involve the franchisee paying a sum of money to the franchiser who in return provides a developed product or service to market together with an established brand name. For example, degree year(s) may be taught by staff in a college, where the HEI is the franchiser and the college is the franchisee. Where a college is providing teaching under a franchising agreement covering, for example, the first year of the HEI’s degree course, the HEI should not include these students in their Early Statistics return.

Articulated courses

24. Articulated courses are arrangements between HEIs and colleges to ensure that the curriculum and assessment in early studies in the college match the expectations of the HEIs in respect of continuing studies. For example a student studying an HND at a college and progressing to the third year of a degree course at an HEI. Access courses provided by colleges which are designed primarily to prepare mature students for entry to courses provided by HEIs are a form of articulated course.

25. In general an HEI should include only these students in their Early Statistics return when the students are studying at the HEI. However, since 2013-14 SFC has funded more than 4,300 additional places to increase the number of articulating students. As the HEIs receive the funding for these places the students whose places are supported by them should be recorded in the Early Statistics Return. Institutions should count these students in table 1 of the Early Statistics Return and in the Early Access Return.

Joint courses

26. These courses exist where two or more institutions contribute their particular expertise in the joint development and joint delivery of courses. A memorandum of co-operation generally sets out the respective roles and contributions agreed between the various parties. Students undertaking such courses will generally be taught by staff from both institutions and studies will be located in either or both institutions.

27. In general where an institution is making the provision for the entire year(s) of a course then that institution should include the students on the course in their Early Statistics return. Where in any one year of a course the pattern of student attendance is shared between institutions then an institution should include the students in their Early Statistics return when the institution is providing the majority of the provision. Where in any one year of a course the pattern of student attendance is such that there is no clear majority provider then the institution should contact SFC for guidance at HEdatareturns@sfc.ac.uk.

28. Institutions collaborating in taught postgraduate provision at an Innovation Centre can
agree amongst themselves who counts which of the taught postgraduate students in their Early Statistics returns, see paragraph 152.

29. The above guidance covers only the forms of collaboration that SFC regards as collaborative courses for funding purposes. This excludes, for example, circumstances such as:

- Institution A provides a course, taught by its staff in accommodation rented from institution B – in this case institution A counts the students.
- Institution A pays for a lecturer from institution B’s staff to teach part of an institution A course – in this case institution A counts the students.
- Institution A provides services such as validation for a course taught by institution B – in this case institution B counts the students.

Full cost-recovery courses

30. The Scottish Government regulates the tuition fees for full-time degree and HN courses. Institutions have flexibility in what fee levels they set for other courses. If tuition fees for a course are set at full cost-recovery level then the course is not eligible for funding, see paragraphs 187 to 190. If institutions are in doubt about whether any of their courses are full cost-recovery then they should contact SFC, at HEdatareturns@sfc.ac.uk, to discuss this.

Provision supported by SFC’S funding for Upskilling or Skills Shortages or the Young Person’s Guarantee (YPG)

31. Although provision supported by SFC’S funding for Upskilling or Skills Shortages or the Young Person’s Guarantee Provision is not supported by the Main Teaching Grant and not associated with allocations of funded places it is still classified as being eligible for funding and should be counted in the Early Statistics Return if it leads to a qualification or credits at HE level.
Section 4: Tables for the Early Statistics Return for 2022-23

Introduction

32. The Early Statistics Return for 2022-23 contains fifteen tables (tables 1, 2a/b/c/d, 3a/b, 4a/b/c/5, 6, 7, 8 and 9) but no institution will have more than nine tables to complete. The main table, table 1, is the only table that every institution must complete. This table collects information on the FTE numbers of all students eligible for funding and of students in the controlled subject areas eligible to pay the tuition fees for rest of UK students.

33. Institutions with Initial Teacher Education (ITE) provision complete tables 2a to 2d. Table 2a collects information on all ITE courses, including the new routes courses that institutions have introduced in recent years, while table 2b collects information on each new route. Table 2c records the subjects that PGDE Secondary students are aiming to teach in, while table 2d collects the subjects that students on other new routes Secondary courses are training to teach.

34. Table 3a collects information on students on medicine degree courses and table 3b covers dentistry degree courses.

35. Institutions with nursing and midwifery pre-registration provision complete tables 4a, 4b and 4c. Institutions with four-year Honours nursing courses complete table 4b while table 4a is completed by the other institutions with nursing and midwifery pre-registration courses, with the exception of the Open University in Scotland which completes table 4c.

36. Table 5 collects information on students who have started on paramedic education courses since 2020-21.

37. Table 6 is a new table collecting information on the intake to prosthetics and orthotics, which has been classified as controlled provision for 2022-23.

38. Table 7 is completed by those institutions that still have students whose places are funded through the European Social Fund’s Developing Scotland’s Workforce programme.

39. Table 8 collects information on students undertaking Graduate Apprenticeships.

40. Table 9 is a reinstated table that collects information on the use of funded places for taught postgraduate students at the Innovation Centres.

41. This section describes what information is collected in each table. Most of the information relates to students eligible for funding. Section 6 defines what students should be classified as being eligible for funding. Sections 9 to 11 define the categories...
used in the tables and how to count students in the tables. Where possible, classifications are based on information collected in fields in the Higher Education Statistics Agency (HESA) Student Record, see annex C which is in an accompanying spreadsheet.
Table 1: Students eligible for funding in all subject areas and students eligible for rest of UK tuition fees in the controlled subject areas, 2022-23

42. The main table of the Early Statistics Return, table 1, is used to collect information on enrolments of all students eligible for funding and of students in the controlled subject areas eligible for the tuition fees for rest of UK students. This information is collected to:

- Monitor overall levels of enrolments of students eligible for funding.
- Monitor use of allocations of funded places.
- Monitor adherence to the consolidation policies for the controlled and non-controlled subject areas.

New Routes Initial Teacher Education courses

43. In recent years institutions have introduced alternative and new routes into Initial Teacher Education (ITE) to help meet the demand for teachers in priority areas and to help diversify the workforce. The Early Statistics Return collects information on these routes to monitor their use and to inform allocations of funded places for these courses. SFC announcement SFC/AN/02/2022 provides information on the intake targets for ITE courses for 2022-23.

44. For the Early Statistics Return the term ‘new routes’ is used to cover both alternative routes introduced by existing ITE providers and courses introduced by new ITE providers. The ITE courses that existed before the new routes were introduced are referred to as the ‘core’ courses.

New Subject Areas for 2022-23

45. Table 1 has two new subject areas for 2022-23. In 2022-23 the first cohort of students on the HCP-Med course will have reached year three of the course, which for funding purposes is classified as clinical provision compared to the first two years which are classified as pre-clinical provision. Table 1 now has separate subject categories for HCP-Med Clinical and HCP-Med Pre-clinical.

46. Prosthetics and orthotics has been classified as a controlled subject. The provision for students starting on the prosthetics and orthotics course from 2022-23 onwards is classified as controlled. A new subject area has been added to table 1 to collect the intakes to this course of students eligible for funding and of students eligible for rest of UK student tuition fees.
Students in the controlled subject areas eligible for rest of UK tuition fees

47. The consolidation policy for controlled subject areas covers students eligible to pay the tuition fees for rest of UK (RUK) students as well as students eligible for funding. Therefore table 1 collects the numbers of students eligible for RUK fees in the controlled subject areas.

48. This includes students from the Republic of Ireland who started on their courses from 2021-22 onwards as, following Brexit, these students pay the same tuition fees as RUK students. Annex B lists some specific types of student who, if they satisfy the relevant residence criteria, can be eligible for rest of UK tuition fees.

Provision supported by SFC'S funding for Upskilling or Skills Shortages or the Young Person’s Guarantee (YPG)

49. Students whose provision is supported by SFC'S funding for Upskilling or Skills Shortages or the Young Person’s Guarantee (YPG) are classified as being eligible for funding if their course leads to a qualification or credits at HE level. The FTE of these students should be counted in table 1.

50. The FTE associated with this provision does not count against allocations of funded places as this provision is not supported by the teaching grant for these places. Therefore institutions are asked to separately identify the total FTE in table 1 associated with provision leading to a qualification or credits at HE level that is supported by the funding for Upskilling or YPG. This FTE is excluded from the FTE of eligible for funding students in the non-controlled subject areas that is compared with the institution’s allocation of non-controlled funded places, see paragraph 157.

Autumn Count

51. As the Early Statistics Return is collected during the session, institutions are asked to return forecasts of their enrolments expected later in the session, i.e. after the reference date for the Early Statistics Return of 1 December. Students who had been in attendance at the institution on or before the reference date are referred to as being in the ‘Autumn count’, with other students referred to as being in the ‘Forecast’ numbers.

52. In recording the FTE student numbers in table 1 institutions must provide separate figures for the Autumn count (columns 1 and 4 for students eligible for funding, and column 10 for students eligible for RUK tuition fees) and for the forecast enrolments (columns 2 and 5 for students eligible for funding, and column 11 for students eligible for RUK tuition fees).
Definition of the Autumn Count

53. The Autumn count covers all students who satisfy the various criteria for inclusion, see Section 6, and who were either:

- Students at the institution on 1 December 2022, or
- Not students on 1 December 2022, but had enrolled at the institution after 1 August 2022 and:
  a. Attended for more than five weeks, where length of course is greater than or equal to 20 weeks, or
  b. Attended for more than a quarter of the length of the course, where length of course is less than 20 weeks.

54. In some cases students may not have finalised the exact content of their year of study on enrolment. In these cases institutions should use their best estimates of the total amount of FTE enrolled for, based on declared intentions and/or previous patterns for the same course. Although these figures contain some estimates they belong in the Autumn count as they relate to students already enrolled. Institutions should prepare and keep a clear note of the methods and calculations they use to estimate the FTE for these enrolments.

Courses which cross academic sessions

55. Institutions should take care to avoid double-counting or omitting FTE numbers when recording students on courses which start part-way through one session and finish part-way through the next. There are several ways of counting these students (except for controlled nursing and midwifery pre-registration students, see paragraphs 125 to 127). It does not matter which method an institution chooses as long as, taken over all the sessions, the FTE of a student on a cross-session course is recorded accurately without omission or double counting.

56. For example, suppose a full-time course runs from January to December 2023. If the institution is counting the full FTE of these students in the forecast enrolments in their Early Statistics Return for 2022-23 then the institution should not count any of this FTE in their Early Statistics Return for 2023-24. When completing the 2023-24 return, the institution would include their forecasts of the students who will take the January to December 2024 run of the course. Hence the institutions’ figures for each session would include those on one, and only one, run of the course.

57. Alternatively, the institution might count the students partly within each of the sessions for which they attend. Thus, students on the January to December 2023 run of the course might count as, say, 0.67 FTE each in session 2022-23 then 0.33 FTE each in...
session 2023-24. The institution would then count the students expected on the January to December 2024 run of the course as 0.67 FTE each in session 2023-24 and 0.33 FTE each in session 2024-25, and so on.

Recording students on controlled three-year nursing and midwifery pre-registration courses whose course years span academic sessions

58. To ensure that funded populations for three-year nursing and midwifery pre-registration courses are being derived on the same basis it is necessary to ensure that institutions return information on a comparable basis. The full FTE for a course year should be returned in the session in which the course year starts. See paragraphs 125 to 127 for more details.

Forecast enrolments

Estimating future enrolments in the current session

59. Institutions must, as far as is possible at the time the return is made, estimate the FTE numbers of students expected to enrol between 1 December 2022 and 31 July 2023, and who are expected to remain students for more than five weeks or for more than a quarter of the length of the course in the current session, see paragraph 53.

60. Therefore, in making their forecasts of enrolments later in the session institutions should take account of the number of enrolments after 1 December likely to withdraw shortly after starting a course. Institutions should not reduce their forecast enrolments to allow for students enrolled on 1 December who subsequently end their studies prematurely.

Methods of estimation

61. Forecasts are by their nature subject to some uncertainty. Institutions might base them on the actual FTE numbers of enrolments during the corresponding period of previous years, possibly adjusted for:

- Material differences from previous years in the numbers or types of courses offered.
- Changes in the Autumn enrolments from previous years.

62. For some courses, such as those starting in January, institutions might use the actual number of students they expect will take the course, based upon the acceptances to date. Institutions should prepare and keep a clear note of the methods and calculations they use to estimate forecast enrolments.
Institutions should be aware that if the forecast element makes up a notable proportion of the total FTE of a funding cell (defined as a combination of subject area and level of study) and if the actual student numbers turn out to be notably fewer than the forecast amount then SFC may subsequently take action if there are any financial implications.

Comparisons with the Early Statistics and Final Figures for 2021-22

Columns (14) to (17) of table 1 show the corresponding figures taken from your institution’s Early Statistics return for 2021-22, including students eligible for RUK fees in the controlled subject areas. Columns (18) to (21) show the percentage differences in the Early Statistics from 2021-22 to 2022-23.

Columns (22) to (25) of table 1 show the corresponding figures taken from your institution’s Final Figures return for 2021-22. Columns (26) to (29) show the percentage differences from the Final Figures for 2021-22 to the Early Statistics for 2022-23.
Tables for Controlled Subjects (2a, 2b, 2c, 2d, 3a, 3b, 4a, 4b, 4C, 5, 6)

66. Tables 2a-d, 3a-b, 4a-c, 5 and 6 collect further information on students in the controlled subject areas of medicine, dentistry, Initial Teacher Education, nursing and midwifery pre-registration, paramedic education, and prosthetics and orthotics. This information is collected to inform recommended intakes and allocations of funded places for these courses for future years.

Intakes

67. Tables 2a/b/c/d, 3a/3b, 4a/b/c, 5 and 6 collect information on the intakes to the controlled subject areas.

68. The intake covers students who enrol for the course for the first time regardless of the year of the course which they enter. Therefore the number of students in the intake to a course may differ from the number of students in the first year of the course. For example, there may be students repeating their first year, or direct entrants to the second year of the course. The intake also includes forecasts of students expected to start later in the session, i.e. a second intake, and students who have transferred from a different course at the same institution.

69. The following SFC announcements contain the intake targets for the controlled subjects for 2022-23:
   
   - Dentistry: SFC/AN/16/2021.
   - Nursing and midwifery pre-registration: SFC/AN/03/2022.
   - Paramedic education: SFC/AN/04/2022.
   - Initial Teacher Education: SFC/AN/02/2022.

   The intake targets cover students eligible for funding and students eligible for rest of UK (RUK) tuition fees.

Tuition Fee Status

70. The tuition fee status is collected for the intakes of students to the controlled subject areas. For all controlled subjects the intake of students eligible for funding and students eligible to pay RUK tuition fees is collected. For medicine, dentistry, paramedic education and prosthetics and orthotics the intake of international students is also collected.

71. The intake of students eligible for funding relates to those students eligible for funding
who enrolled for the course for the first time. If a student started on the course during the session but did not last long enough to be classified as eligible for funding, see paragraph 53, then the student should not be counted in the intake.

72. For medicine, paramedic education and prosthetics and orthotics, the intake of students eligible for funding is split into Scottish domiciled and other. The domicile is based on the student’s permanent home residence prior to starting the course.

73. Students eligible to pay RUK tuition fees are those students entitled to pay the deregulated tuition fees for rest of UK students. Following Brexit students from the Republic of Ireland who started on their courses from 2021-22 pay the same tuition fees as RUK students. Therefore students from the Republic of Ireland who started on their courses in 2022-23 should be included in the intake of students eligible to pay RUK tuition fees in 2022-23. Annex B lists some specific types of student who can be eligible for RUK tuition fees if they meet the relevant residence criteria.

74. The intake of international students relates to those students in the intake who were neither eligible for funding nor eligible to pay RUK tuition fees. Following Brexit students from the EU, excluding those from the Republic of Ireland, who started on their courses from 2021-22 onwards pay the international fee rate. Therefore students from the EU, excluding the Republic of Ireland, who started on their courses in 2022-23 should be included in the intake of international students in 2022-23.
Table 2a: Initial Teacher Education courses, 2022-23

75. Table 2a collects the following information on students on Initial Teacher Education (ITE) courses:

- The FTE numbers of students eligible for funding by course and year of course.
- The FTE number of students eligible for funding and students eligible to pay rest of UK tuition fees in the intake to each course.
- The headcount of students eligible for funding in the intake to the course able to teach in the Gaelic medium.

See paragraph 68 for the definition of the intake to a course.

New Routes Initial Teacher Education courses

76. In recent years institutions have introduced alternative and new routes into ITE to help meet the demand for teachers in priority areas and to help diversify the workforce. Table 2a collects separate information for these new routes. In this context new routes covers courses put on by new ITE providers as well as alternative routes put on by existing providers. The ITE courses that existed before the new routes were introduced are referred to as the ‘core’ courses.

Tuition fee status of students in the intakes to Initial Teacher Education courses

77. The intake to ITE courses is split into students eligible for funding and students eligible for rest of UK (RUK) tuition fees to monitor the take up of places by students eligible for funding, who will mainly be Scottish-domiciled students, and to inform allocations of funded places for future years. Paragraphs 70 to 74 contain further information on the tuition fee status of students.

Students able to teach in the Gaelic medium

78. Table 2a collects the headcount of students able to teach in the Gaelic medium in the intakes to PGDE, Undergraduate Primary and Combined Degrees in Education courses. As part of the promotion of Gaelic as a language SFC monitors the number of entrants to these ITE courses who, if they successfully complete their course, will be able to teach in the Gaelic medium.

79. A student who will be able to teach in the Gaelic medium is defined as a student who, upon successful completion of the ITE course, is either:

- A native Gaelic speaker, who has retained proficiency in the language, or
• The holder of a degree in Gaelic, or a degree which includes a substantial component of the Gaelic language, or

• Otherwise a speaker of the Gaelic language to the above standard.

Table 2b: New Routes Initial Teacher Education Courses, 2022-23

80. Table 2b collects similar information to table 2a but for each new route ITE course. The new routes cover courses put on by new ITE providers as well as alternative routes put on by existing providers. Annex C, which is in an accompanying spreadsheet, indicates which subject area each new ITE route should be counted under.

Table 2c: Subjects that Students in the Intake to PGDE Secondary Courses are Training to Teach, 2022-23

81. Table 2 of SFC announcement SFC/AN/02/2022 shows the target intakes for 2022-23 for each Secondary teaching subject for each institution. To monitor actual intakes for the teaching subjects table 2c collects the teaching subjects for the intake to PGDE Secondary courses, while table 2d collects the subjects that students eligible for funding on other new routes Secondary courses are training to teach.

82. The intake targets for Secondary courses cover students eligible to pay rest of UK tuition fees as well as students eligible for funding.

83. As some students aim for dual subject teaching qualifications, table 2c allows both single and dual teaching subjects to be recorded, including the specific combinations of subjects students are training in. The numbers of students in the intake to PGDE Secondary courses training to teach one subject should be counted against the subject they are training to teach in either column (1) for core courses or column (2) for new routes.

84. The students training to teach two subjects should be recorded in columns (4) to (6) in either the rows relating to core courses or in those relating to new routes. Columns (4) and (5) record the combinations of teaching subjects. Each cell for entry has a drop down menu that allows the relevant teaching subjects to be selected. The number of students taking each combination of teaching subjects should be entered in column (6).

Table 2d: Subjects that Students Eligible for Funding on Other New Routes Initial Teacher Education Secondary Courses are Training to Teach, 2022-23

85. Table 2d complements table 2c by collecting information on the subjects that the students eligible for funding on other new routes Secondary courses are training to
teach. The information is collected by type of new routes Secondary course, which are Other Taught Postgraduate Secondary, Combined Degrees in Education Secondary and Other Undergraduate Secondary.

86. For all three types of course the teaching subject for both students eligible for funding in the intake and continuing students should be recorded.

87. As some students aim for dual subject teaching qualifications, table 2d allows both single and dual teaching subjects to be recorded, including the specific combinations of subjects students are training to teach.

88. The teaching subjects for students training to teach one subject should be recorded in the appropriate rows of column (1) for Other Taught Postgraduate Secondary, column (10) for Combined Degrees in Education Secondary new routes and column (19) for Other Undergraduate Secondary new routes. The combinations of teaching subjects being taken by students training to teach two subjects should be recorded in columns (5) and (6) for Other Taught Postgraduate Secondary, columns (14) and (15) for Combined Degrees in Education Secondary or columns (23) and (24) for Other Undergraduate Secondary. Each cell for entry in these columns has a drop down menu that allows the relevant teaching subject to be selected.

89. The FTE number of students eligible for funding in the intake to Other Taught Postgraduate Secondary should be recorded in either column (2), if they are training to teach a single subject, or in column (7), if they are training to teach two subjects. The FTE number of continuing students eligible for funding in Other Taught Postgraduate Secondary should be recorded in either column (3) or column (8) depending on whether they are training to teach a single subject or two subjects.

90. The FTE number of students eligible for funding in the intake to Combined Degrees in Education Secondary new routes should be recorded in either column (11), if they are training to teach a single subject, or in column (16), if they are training to teach two subjects. The FTE number of continuing students eligible for funding in Combined Degrees in Education Secondary should be recorded in either column (12) or column (17) depending on whether they are training to teach a single subject or two subjects.

91. For Other Undergraduate Secondary the FTE number of students eligible for funding in the intake should be recorded in either column (20) or column (25) depending on whether they are training to teach a single subject or two subjects. The FTE number of continuing students eligible for funding should be recorded in either column (21), if they are training to teach a single subject, or in column (26), if they are training to teach two subjects.
Table 3a: Students on Medicine Degree Courses, 2022-23

92. Table 3a collects the following information on students on degree courses in medicine:

- The number of students in the intake by course and tuition fee status.
- The number of Scottish-domiciled students in the intake by entry criteria.
- The FTE number of students by course, year of course and tuition fee status.
- The FTE number of medical degree students on intercalating courses.

93. The headcount is collected for the intake for comparisons with the intake targets, while the FTE is collected for all enrolments for comparisons with funded places and with the places for rest for UK students for which compensation for expensive strategically important subjects has been allocated.

Tuition fee status

94. There are separate rows in table 3a for the different tuition fee status of medical students:

- Students eligible for funding.
- Students eligible for rest of UK (RUK) tuition fees.
- International students.

Paragraphs 70 to 74 contain further information on tuition fee status.

95. To monitor where medical students are coming from the students eligible for RUK tuition fees are further split into:

- Rest of UK domiciled.
- Other.

96. The domicile is based on the student’s permanent home residence prior to starting the course. The ‘Other’ category includes students from the Republic of Ireland who started on their courses from 2021-22 onwards.

97. Students paying the fee rate for international students are further split into:

- Those from the International Medical University of Malaysia.
- Those on the closed loop programme that are going back to Canada.
- Other international students.
This information is collected to monitor the use of the specific medical degree routes for international students.

Medical Degree Courses

98. Two new degree courses to train medical students have been introduced in recent years: the Scottish Graduate Entry Medicine programme and HCP-Med which is a programme for healthcare professionals seeking to study for a medical degree. Table 3a splits medical students according to the type of course they are studying on. The other medical degree courses are referred to as the ‘core’ medicine courses.

Scottish Graduate Entry Medicine

99. The Scottish Graduate Entry Medicine (ScotGEM) programme, which is run collaboratively by the Universities of Dundee and St Andrews, started in 2018-19. The first two years of the course are undertaken at St Andrews University and the final two years of the course at Dundee University.

HCP-Med

100. In 2020-21 Edinburgh University introduced HCP-Med, a new five-year course for healthcare professionals seeking to study for a medical degree. 2022-23 will be the first academic session in which students are in year three of the course, which is the first year of the course to be classified as clinical provision.

Scottish-domiciled students in the intake to medical degree courses

101. The intake of students eligible for funding to core medicine degree courses is split into Scottish-domiciled students and other students where the domicile is based on the student’s permanent home residence prior to starting the course. The ‘Other’ category will cover students who are eligible for ‘Scottish’ fees but whose permanent home residence prior to starting the course was outwith Scotland.

102. The numbers of Scottish-domiciled entrants to medical schools is collected separately because Scottish Government Ministers remain committed to increasing the number of Scottish-domiciled students, see paragraphs 9 to 11 of SFC/AN/11/2022.

Entry criteria

103. The Scottish-domiciled entrants to medical courses are further split by entry criteria to monitor both the use of additional funded places to widen access to medicine and the institutions’ progress in widening access to their medical courses.
104. Scottish-domiciled entrants to pre-clinical medicine should be split according to the following entry categories:

- Entered via a pre-entry medicine programme.
- Satisfies widening access criteria.
- Other Scottish-domiciled entrants.

105. To be a widening access entrant a student must be from the SIMD 20 areas and/or be from a care experienced background, see paragraph 168 for further information on the SIMD20 areas.

Year of course

106. The year of course is collected for all types of student. The year of course for students eligible for rest of UK tuition fees is collected partly because SFC provides funding to support the places of medical students who pay RUK fees although these students are not eligible for funding. This is because the price that SFC pays for clinical provision is more than the RUK tuition fees. To ensure that medical provision remains viable SFC compensates the institutions for the difference between the SFC price for clinical provision and an assumed RUK tuition fee for medical students. SFC use the information collected on students paying RUK fees to compare the actual enrolments with the numbers of RUK places for which SFC provide additional funding.

107. The second reason for collecting the year of course for students eligible for RUK fees and for international students is to monitor the numbers of students at each stage of the various courses.

Pre-clinical and Clinical Medicine

108. Table 3a automatically calculates the numbers of students in the pre-clinical and clinical stages of each course from the student numbers entered for each year of the course. Columns (17) and (18) show the numbers of students in the pre-clinical and clinical stages respectively for the core medicine courses, with columns (24) and (25) showing this for the ScotGEM programme and columns (30) and (31) for the HCP-Med course.

109. The pre-clinical stages are:

- Years 1 and 2 of the core medicine courses and of the HCP-Med course.
- The other years of St Andrews University’s core medicine course.
- Year 1 of the ScotGEM course.
110. The clinical stages are:

- Years 3 to 5 of the core medicine courses, with the exception of the course at the University of St Andrews, and of the HCP-Med course.
- Years 2 to 4 of the ScotGEM course.

**Students on intercalating degrees**

111. Institutions should enter the number of medical students on intercalating degree courses at their institution in column (33) of table 3a. Institutions should not include any of their own medical students who are undertaking an intercalating year at another institution. These numbers are in addition to the total FTE numbers of students on medicine degree courses shown in column (32).
Table 3b: Students on Dentistry Degree Courses, 2022-23

112. Table 3b collects the following information on students on dentistry degree courses:

- The FTE number of students in the intake by tuition fee status.
- The FTE number of students by year of course and tuition fee status.
- The FTE number of dentistry students on intercalating courses.

Intake for 2022-23

113. Restrictions caused by COVID-19 and the precautions that were implemented to control the virus had a severe impact on the ability of Scotland’s dental schools to provide the necessary specialised training to dental students in a safe and effective manner. The reduction in access to clinical facilities impacted the ability of students to gain the necessary skills and competencies for successful course completion and registration. As a result of these restrictions, continuing students needed to extend the length of their course to gain access to clinical facilities that had been restricted to them.

114. This extension for continuing students directly impacted the dental schools’ ability to take on new entrants in 2021-22 and 2022-23, as their dental training facilities do not have the physical capacity to accommodate an extra year of students. This led to the Scottish Government’s decision to set an intake target for 2022-23 that was to be filled by recruiting 50% of the intake target in 2021-22 and 50% of the intake target in 2022-23. There was no actual intake to dentistry courses in 2021-22 and 2022-23 saw the first new intake of dentistry students for two years. SFC announcement SFC/AN/16/2021 provides further information on this.

Tuition fee status

115. There are separate rows in table 3b for the different tuition fee status of dentistry degree students:

- Students eligible for funding.
- Students eligible for rest of UK tuition fees.
- International students.

Paragraphs 70 to 74 contain further information on tuition fee status.

Year of course

116. The year of course is collected for every type of student. The year of course for students eligible for rest of UK tuition fees is collected partly because SFC provides funding to
support the places of dentistry students who pay RUK fees although these students are not eligible for funding. This is because the price that SFC pays for clinical provision is more than the RUK tuition fees. To ensure that dentistry provision remains viable SFC compensates the institutions for the difference between the SFC price for clinical provision and an assumed RUK tuition fee for dentistry students. SFC use the information collected on students paying RUK fees to compare the actual enrolments with the numbers of RUK places for which SFC provide additional funding.

117. The second reason for collecting the year of course for students eligible for RUK fees and for international students is to monitor the numbers of students at each stage of the courses.

Pre-clinical and Clinical Dentistry

118. The numbers of students in the pre-clinical and clinical stages of each course are automatically generated in columns (9) and (10) of table 3b from the enrolments entered for each year of the course in columns (3) to (7). Only students in year 1 of the courses at the Universities of Dundee and Glasgow are in the pre-clinical stage.

Students on intercalating degrees

119. Institutions should enter the number of dentistry students on intercalating degree courses at their institution in column (11) of table 3b. Institutions should not include any of their own dentistry students who are undertaking an intercalating year at another institution. These numbers are in addition to the total FTE numbers of students on dentistry degree courses shown in column (8).
Table 4a: Three-year Nursing and Midwifery Pre-registration Courses, 2022-23

Table 4b: Four-year Nursing and Midwifery Pre-registration Degree Courses, 2022-23

120. Tables 4a and 4b collect information on nursing and midwifery pre-registration courses. Table 4b covers the four-year Honours pre-registration degree courses, while table 4a covers the other pre-registration courses, excluding that at the Open University in Scotland which is covered in table 4c.

121. For historical reasons the non-Honours courses are referred to as the ‘three-year’ nursing and midwifery pre-registration courses, though some of the courses in this category might not actually last three years.

122. Both tables 4a and 4b collect the following information for their specific types of nursing and midwifery pre-registration courses:

- FTE number of students intake to these courses by tuition fee status and field of practice.
- FTE number of students on these courses fees by tuition fee status and field of practice.

Pre-registration

123. The nursing and midwifery pre-registration courses covered by tables 4a and 4b lead to entry to the Nursing and Midwifery Council’s register. The pre-registration courses exclude any provision for students who had previously registered, even if the students are studying to be able to re-register.

Tuition fee status

124. The information on nursing and midwifery pre-registration students is collected separately for students eligible for funding and students eligible for RUK tuition fees. Paragraphs 70 to 74 contain further information on tuition fee status.

Recording three-year nursing and midwifery pre-registration students whose course years span academic sessions

125. To ensure that funded populations are derived on the same basis it is necessary to ensure that institutions return enrolment information for these courses on a comparable basis. For this reason institutions are asked to use the same method to
return the FTE for students on three-year nursing and midwifery pre-registration courses whose course years span academic sessions. The full FTE for a course year should be returned in the Early Statistics Return for the session in which the course year starts.

126. The year of programme should relate to the year that a student commences during the session. Thus for students whose course year spans academic sessions the year of programme should relate to the year that the student starts in the session. The FTE for the full year of the course should be returned for each student. For students starting another course year later in the session, i.e. after the Early Statistics reference data of 1 December, the FTE returned under the relevant year of programme in table 4a should be the full FTE for that course year and not include any FTE relating to the course year which ends earlier in the session.

127. This will mean that students who are on courses that span academic years and who are in their last part year of study should not be counted in the Early Statistics Return. Students should only be counted under the ‘Forecast’ enrolments in table 1 if they were not studying at the Early Statistics reference date.

Intake to the course

128. The intake covers all students starting their programmes during 2022-23, including forecasts of the numbers of students expected to start later in the session. Students entering year 2 of their programmes via the HNC route should be included in the intake.

Continuing EU students eligible for funding

129. Prior to 2021-22 the funded places for three-year nursing and midwifery pre-registration provision were funded at the full SFC teaching price for nursing and midwifery, which is the price for SFC’s teaching price group 4, with no tuition fees being associated with this provision. From 2021-22 the teaching grant for all nursing and midwifery pre-registration provision, i.e. three-year and four-year courses, will be based on funding the places at the teaching price less the degree tuition fee. The exception to this is that funded places associated with continuing EU students on three-year courses will continue to be funded at the full teaching price.

130. To inform the numbers of funded places for 2023-24 associated with continuing EU students, institutions should record their FTE numbers of continuing EU students eligible for funding in 2022-23 in table 4a. A continuing EU student eligible for funding will be an EU student who started on their course prior to 2021-22. The numbers of continuing EU students eligible for funding are to be split by level of study and year of course. The continuing EU students should also be included in the numbers of students eligible for funding studying for each field of practice and hence will be counted in the totals directly above where the numbers of continuing EU students are to be entered in
the spreadsheet.

Table 4c: Nursing Pre-registration Students Eligible for Funding at the Open University in Scotland in 2022-23 and Nursing Pre-registration Students Expected to Continue at the University in 2023-24

131. Table 4c collects the numbers of nursing pre-registration students at the Open University in Scotland in 2022-23 and estimates of the numbers who are expected to continue to be studying at the University in 2023-24.

132. The numbers at the University in 2022-23 will be used to monitor use of funded places and actual intake against intake target. The estimates of the numbers who are expected to continue to be studying at the University in 2023-24 will be used to inform the University’s allocation of funded places for 2023-24.

133. The Open University should record the headcount number of nursing pre-registration students and the intake to nursing pre-registration at the University in 2022-23 split by:
   - Field of practice.
   - Year of study.

134. The Open University should record the headcount number of nursing pre-registration students who are expected to continue to be studying in 2023-24 split by:
   - Academic year they started in.
   - Year of study they will be in in 2023-24.
   - Field of practice.
Table 5: Students on Paramedic Education courses in 2022-23 who had started on their courses from 2020-21 onwards

135. In 2020-21 the Scottish Government started to provide additional funding for intakes to paramedic education programmes at five universities. Table 5 collects the following information for students in 2022-23 who started on these courses from 2020-21 onwards:

- FTE number of students in the intake by tuition fee status.
- FTE number of students by tuition fee status and year of programme.

Intake to the course

136. The intake covers all students starting their programmes during 2022-23, including forecasts of the numbers of students expected to start later in the session. SFC Announcement SFC/AN/04/2022 contains information on the intake targets for paramedic education for 2022-23.

Tuition fee status

137. To inform allocations of funded places for paramedic education for 2023-24 and to monitor the types of student entering these courses there are separate rows in table 5 for the different tuition fee status of paramedic education students:

- Students eligible for funding.
- Students eligible for rest of UK (RUK) tuition fees.
- International students.

Paragraphs 70 to 74 contain further information on tuition fee status.

138. Students eligible for funding are further split into Scottish-domiciled and other students to monitor the numbers of Scottish students on these courses. Paragraphs 72 to 74 contain further information on domicile.
Table 6: Intake to Prosthetics and Orthotics in 2022-23

139. The subject area of prosthetics and orthotics has been classified a controlled subject area for 2022-23. Students starting the prosthetics and orthotics course from 2022-23 onwards will be classified as being on controlled provision. Table 6 is a new table to collect the tuition fee status of students starting the prosthetics and orthotics course in 2022-23.

Intake to the course

140. The intake covers all students starting the prosthetics and orthotics course in 2022-23, including forecasts of the numbers of students expected to start later in the session.

Tuition fee status

141. To monitor the types of student entering the prosthetics and orthotics course the intake is split by tuition fee status:

- Students eligible for funding.
- Students eligible for rest of UK tuition fees.
- International students.

Paragraphs 70 to 74 contain further information on tuition fee status.

142. Students eligible for funding are split into Scottish-domiciled and other students to monitor the numbers of Scottish students on these courses. Paragraphs 72 to 74 contain further information on domicile.
Other Tables for the Early Statistics Return

Table 7: Use of Places Funded by the European Social Fund (ESF)'s Developing Scotland's Workforce Programme, 2022-23

143. Table 6 is for reporting the use of the additional places provided through the European Social Fund (ESF)'s Developing Scotland's Workforce (DSW) programme in 2022-23.

144. Institutions should record the number of additional places, for undergraduates and research postgraduates, that have been filled by students eligible for funding on courses eligible under the DSW programme.

145. ESF-funded undergraduate student places should be additional to core SFC-funded student places for 2022-23. ESF-funded research postgraduate student places should be additional to the institution’s number of research postgraduate students eligible for funding in 2015-16.

146. Institutions should enter the courses that the students have enrolled on. This is to provide reassurance that the additional funded places are being used to support the provision for which they were allocated, in line with the ESF eligibility requirements under the DSW programme.

147. The students whose places are funded by ESF are considered eligible for funding and therefore should be included in table 1 of the Early Statistics Return.
148. SFC started to take over the responsibility for funding Graduate Apprenticeships (GAs) in 2021-22. SFC is funding GAs that start from 2021-22 onwards while Skills Development Scotland (SDS) will continue to fund to completion the GAs that started before 2021-22.

149. The students on GAs funded by SFC are eligible for funding while those on GAs funded by SDS are not eligible for funding.

150. Table 8 collects information on all GAs in 2022-23 split by eligibility for funding status, framework and year of programme. Table 8 also collects the number of new GAs in 2022-23. This information is to monitor the number of places for new GAs that have been used, the total number of funded places for GAs that have been used and the total number of GAs.

Table 8: Students on Graduate Apprenticeships, 2022-23

148. SFC started to take over the responsibility for funding Graduate Apprenticeships (GAs) in 2021-22. SFC is funding GAs that start from 2021-22 onwards while Skills Development Scotland (SDS) will continue to fund to completion the GAs that started before 2021-22.

149. The students on GAs funded by SFC are eligible for funding while those on GAs funded by SDS are not eligible for funding.

150. Table 8 collects information on all GAs in 2022-23 split by eligibility for funding status, framework and year of programme. Table 8 also collects the number of new GAs in 2022-23. This information is to monitor the number of places for new GAs that have been used, the total number of funded places for GAs that have been used and the total number of GAs.
Table 9: Use of Funded Places for 2022-23 for Taught Postgraduates at Innovation Centres

151. Table 9 collects information on the use of the funded places for taught postgraduate students at the Innovation Centres. SFC last collected this information through the Early Statistics Return in 2019-20. SFC is collecting this information again as it is reviewing the use of these places.

152. The institutions collaborating in taught postgraduate provision at an Innovation Centre should agree amongst themselves which institution reports which students. For example, each of the collaborating institutions could report the students enrolled with them or, perhaps, the lead institution could report all of the taught postgraduate students eligible for funding at their Innovation Centre.
Comparing Enrolments with Funded Places and Consolidation Numbers and Comparing Intakes with the Intake Targets for the Controlled Subjects, 2022-23

153. The worksheet ‘Comparisons with Targets’ on the spreadsheet for completing the Early Statistics Return contains the following comparisons of actual enrolments and intakes with targets:

- The numbers of students eligible for funding in the individual controlled subject areas compared to funded places or compared to intake targets in the case of medicine.
- The numbers of taught postgraduate and undergraduate students eligible for funding in the non-controlled subject areas compared to funded places.
- The numbers of students compared to the consolidation student numbers for the controlled and non-controlled subject areas.
- The actual intakes compared to the target intakes for the controlled subjects.

154. The student numbers in these tables are populated automatically using figures entered in tables 1, 2a, 3a/b, 4a/b/c, 5 and 6.

155. The funded places and consolidation student numbers for 2022-23 are shown in the following tables that were published with the final university funding allocations for 2022-23:

- A2a - Non-controlled funded student places AY 2022-23.
- A2c - Additional student places funded by the Scottish Government for AY 2022-23.
- A2b - All controlled student places for AY 2022-23.
- C2a - Consolidation student numbers for non-controlled subject areas for AY 2022-23.
- C2b - Consolidation student numbers for controlled subject areas for AY 2022-23.

These are some of the additional tables published with the final university funding allocations for 2022-23, which are available on SFC’s website.

156. The non-controlled funded places used in the comparisons with the actual enrolments include the additional places for undergraduate provision funded by the European Social Fund’s Developing Scotland’s Workforce Programme.

157. Students whose provision is supported by SFC'S funding for Upskilling or Skills Shortages
or the Young Person’s Guarantee (YPG) and leads to a qualification or credits at HE level are classified as being eligible for funding. However, the FTE associated with this provision is not included in the non-controlled enrolments compared with the allocation of funded places as this provision is not supported by the teaching grant for these places.

158. Links to the SFC announcements containing the intake targets for the controlled subjects for 2022-23 are given in paragraph 69.
Section 5: Early Access Return for 2022-23

Introduction

159. The Early Access Return collects the numbers of Scottish-domiciled undergraduate entrants from the most deprived areas and the total number of Scottish-domiciled undergraduate entrants. This information is split by:

- Entrants from the 20% and from the 40% most deprived areas.
- Entrants from degree and other undergraduate courses.
- Entrants to full-time and part-time courses.
- Actual and forecast numbers of entrants.

160. This information will be used to monitor progress against Commission on Widening Access (CoWA) targets and to monitor progress against Outcome Agreement measures.

161. Paragraphs 163 to 177 define the categories used for the Early Access Return.

Change to the population for the Early Access Return for 2022-23

162. To bring the Early Access Return into line with the Outcome Agreement measure and with the reporting requirements for the HESA Student Return, students who start a course and leave within the first two weeks without completing should be excluded from the Early Access Return.

Definitions for the Early Access Return

Entrant

163. An entrant is someone who started on their current programme of studies during the session.

Undergraduate

164. For the Early Access Return the information is collected separately for entrants to degree courses and for entrants to all undergraduate courses. The definition of an undergraduate used for this return is the same as that used for Outcome Agreement measures, that is a student aiming for either a first degree or an HNC/HND/Diploma/Certificate of Higher Education.

165. In terms of the ‘Qualification category’ (QUALCAT) field in the HESA Student Record the values covered by this return are:
Degree: H0003, H0004, H0005, H0009, I0001, M0002
Other Undergraduate: C0000, C0001, J0002, J0003

Deprivation Status

166. The deprivation status is the same as used for the Outcome Agreement measures for 2022-23 and based on the Scottish Index of Multiple Deprivation (SIMD) 2020. The postcode of a Scottish-domiciled student should be matched to a datazone and then to a SIMD rank.

167. SFC divide the SIMD 2020 ranks into quintiles, with each quintile containing 20% of the Scottish population. The most deprived quintile is defined to be MD20, while MD40 is defined to be the areas covered by the two most deprived quintiles.

168. The following table details the SIMD 2020 datazone ranks contained in each SFC quintile:

<table>
<thead>
<tr>
<th>SFC Deprivation Quintile</th>
<th>SIMD 2020 Datazone Rank</th>
</tr>
</thead>
<tbody>
<tr>
<td>From</td>
<td>To</td>
</tr>
<tr>
<td>1 - 20% most deprived (MD20)</td>
<td>1 1,395</td>
</tr>
<tr>
<td>2</td>
<td>1,396 2,790</td>
</tr>
<tr>
<td>3</td>
<td>2,791 4,185</td>
</tr>
<tr>
<td>4</td>
<td>4,186 5,580</td>
</tr>
<tr>
<td>5 - 20% least deprived</td>
<td>5,581 6,976</td>
</tr>
<tr>
<td>1 and 2 - 40% most deprived (MD40)</td>
<td>1 2,790</td>
</tr>
</tbody>
</table>

169. The Early Access Return collects the numbers of undergraduate entrants from SFC deprivation quintiles 1 and 2, with the numbers of students from the 40% most deprived areas being calculated automatically from the numbers from the first and second quintiles.

Mode of Study

170. The Early Access Return asks institutions to split their Scottish-domiciled undergraduate entrants from the 20 and 40 per cent most deprived areas into those studying full-time and those studying part-time. This information allows SFC to monitor how students
from deprived backgrounds are accessing higher education.

171. A full-time course involves the student in an average of at least 21 hours study a week, including private study, for periods of more than 24 weeks per year or, in the final year, for 24 weeks or less if the earlier years met the definition of full-time. A short full-time course with an overall course length of 24 weeks or less is classed as being part-time. Any course that does not satisfy the definition for being full-time is classified as being part-time.

172. Institutions should record their actual numbers of Scottish-domiciled full-time undergraduate entrants in column (1) and their forecast numbers of full-time entrants in column (2). Similarly, institutions should record their actual numbers of Scottish-domiciled part-time undergraduate entrants in column (4) and their forecast numbers of part-time entrants in column (5).

Actual and Forecast Student Numbers

173. Institutions have to include forecasts of Scottish-domiciled undergraduate entrants later in the session as well as actual enrolments up to 1 December 2022.

174. Any undergraduate entrant who has been in attendance at the institution on or before 1 December 2022 is classified as an actual enrolment and counted in either column (1) or column (4) of the table depending on their mode of study.

175. Institutions should count under forecast enrolments their numbers of Scottish-domiciled undergraduate entrants expected to start after 1 December 2022, excluding an estimate of the number who might be expected to leave within two weeks without completing. Forecast enrolments should be entered in either column (2) or column (5) of the table depending on the mode of study.

176. These estimates will obviously be subject to some uncertainty. Institutions might base these on levels of recruitment in previous years adjusted to take account of any changes in recruitment up to this point of the session and the likely success of any initiatives used to increase the numbers of students from the most deprived areas.

177. Associate students starting their studies at a Further Education college and whose places are supported by the additional places funded by SFC to increase levels of articulation should be included.

Contact and Return Date

178. Any questions or issues relating to the Early Access Return should be emailed to HEdatareturns@sfc.ac.uk.

179. Institutions should return their completed Early Access return along with their Early Statistics return by Monday 19 December 2022. The completed spreadsheet should be
emailed to the address in the paragraph above.
Section 6: Counting and Classifying Students and Courses in the Early Statistics Return

Students and courses counted in the return

180. Inclusion in the Early Statistics Return depends upon the characteristics of the student and of the course. In general the student must be a student eligible for SFC funding, attending a course eligible for SFC funding.

181. Annex C, in the accompanying spreadsheet, indicates the relevant fields in the HESA Student Record that relate to some of the criteria for eligibility for funding.

Summary of courses that are not eligible for funding

182. The following types of course are not eligible for funding:

- Course classified as Continuing Professional Development.
- Other ‘cost-recovery’ course.
- Other publicly funded course.
- Course funded by private sources and ‘closed’ to general applicants.
- Non-credit-bearing course, except research postgraduate provision, or summer schools or access courses where successful completion guarantees a place on a course at higher education level.
- Activity below SCQF level 7.

Summary of students eligible for funding

183. The following characteristics of the student mean the student can be eligible for funding:

- Students paying ‘Scottish’ tuition fee levels.
- Exchange students - inward or outward, consistently across all enrolments.
- Outgoing exchange students who are only away for part of the year for that part of the year in which they attend the institution - if an institution counts incoming exchange students.
- Students on courses where ‘Scottish’ fees do not apply but resident in Scotland, or in the EU if they started on their course prior to 2021-22.
- Students attending access courses or summer schools where successful completion guarantees a place on a course at higher education level.
- Students on Graduate Apprenticeships that started from 2021-22 onwards.
- Students on courses leading to a qualification or credit at HE level that are supported by SFC’s funding for Upskilling or Skills Shortages or the Young Person’s Guarantee (YPG).

Summary of students not eligible for funding

184. Even if the course is eligible for funding the following types of student are not eligible for funding:

- Students assessed as not eligible to pay ‘Scottish’ tuition fee levels.
- Rest of UK students on taught postgraduate courses.
- Students whose fees are at ‘cost-recovery’ level.
- Students taking a place funded by private sources if places are ‘closed’ to other applicants.
- Students taking a place funded wholly or partly from public sources other than SFC.
- Students on sabbatical years or not in attendance for other reasons.
- Students withdrawing from courses after a short time, generally less than five weeks.
- Intercalating medical or dental students at other institutions.
- Students on a part-time course beyond the normal duration.
- Students of other institutions, e.g. on an articulated or a franchised course, with the exception of students whose places are supported by the additional funded places provided by SFC for articulation.
- Students studying for the whole of their course outwith Scotland, unless they are prisoners who are ordinarily resident in Scotland but having to serve their sentences elsewhere in the UK.
- Students spending an optional year away from the institution, unless on a sandwich placement year or, in some cases, on study abroad.
- Postgraduate students who have completed the work of the course but have yet to complete the requirements for the award.
• Students assessed or examined in the year but making no additional demands on their teaching departments.

• Graduates or members of staff of the institution who are studying for higher doctorate level qualifications or professional qualifications, involving little or no academic input from the institution.

Flowchart of student eligibility for funding

185. The following flowchart summarises eligibility criteria. Note that, in particular cases, some students who satisfy these criteria may still be excluded from the return. This may be because of the rules governing different modes of provision, see Section 8, and the guidance on the Autumn count and forecast enrolments later in the session, see paragraphs 51 to 63.
Student on an Eligible Course
(See paragraphs 186 to 196)

Yes

No

Student eligible by personal circumstances?
(see paragraphs 197 to 222)

Count

Yes

No

Student domiciled in Scotland (or EU if started before 2021-22)?
(see paragraph 204)

Yes

No

No
Courses not eligible for funding

186. Students on the following types of course are not eligible for funding.

Full cost and cost-recovery courses

187. Courses which are full cost-recovery are not eligible for funding. That is courses for which the income from the students’ fees plus any funding from any sources other than SFC is intended to cover the costs of provision. The costs are to include an appropriate share of the institution’s overheads, e.g. administration, buildings, heating, etc. Most of these courses fall into one of the following three categories:

- Continuing Professional Development.
- Other cost-recovery courses.
- Other publicly funded courses.

Continuing Professional Development (CPD)

188. Circular letter SFC/16/2011 described the arrangements for the reporting of knowledge exchange activity and outcomes. Pages 15-17 of this letter define and provide information on CPD provision.

189. If the income for a course should be returned under the CPD category in the reporting of knowledge exchange outcomes then the students on that course should not be counted in the Early Statistics Return.

Other cost-recovery courses

190. These are full cost-recovery courses which, because their aim is not to develop the employment-related skills of the students, do not fall into the CPD category.

Other publicly-funded courses

191. These are courses funded wholly or partly from public sources other than the main formula-based grants provided by SFC. Examples of such courses would be in-service teacher education courses funded by education authorities.

192. SFC has taken over the responsibility for funding Graduate Apprenticeships from Skills Development Scotland (SDS). SFC will fund Graduate Apprenticeships that start from 2021-22 onwards. SDS will continue to fund Graduate Apprenticeships that started prior to 2021-22 until completion. Graduate Apprenticeships that started prior to 2021-22
will therefore continue to be not eligible for funding.

Closed courses

193. Courses or teaching provision funded from private sources and ‘closed’ to general applicants, i.e. not open to all suitably qualified candidates, are not eligible for funding. Examples of this type of provision would be a course financed by a company solely for its employees.

Non-credit-bearing courses

194. Courses for taught postgraduates and undergraduates that are not credit-bearing are not eligible for funding, unless they are access courses or summer schools where successful completion guarantees a place on a course at higher education level.

Activity below Scottish Credit and Qualifications Framework (SCQF) level 7

195. Courses for activity below SCQF level 7 are not eligible for funding unless this forms part of an access course. Student activity related to modules or other learning activity graded below SCQF level 7 should only be considered eligible for funding where it forms part of an access course, that is, a course which is designed to prepare students who do not have standard entry qualifications for higher education courses.

196. Courses such as stand-alone non-advanced European Computer Driving Licence (ECDL) may not be considered access courses save in exceptional circumstances. If an institution is any doubt about whether a course containing activity below SCQF level 7 can be considered an access course then they should contact SFC, at HEdatreturns@sfc.ac.uk, for a decision. No other activity graded below SCQF level 7 should be considered eligible for funding.

Students eligible for funding

197. If a student is on a course that is eligible for funding then the following paragraphs indicate what characteristics of the student enable him/her to be classified as being eligible for funding.

Exchange students

198. In general institutions can classify either incoming or outgoing exchange students as being eligible for funding, but not both. However, if an institution that classifies incoming exchange students has outgoing exchange students who are only away for part of the year then they can count these students for the time spent at the institution.

199. Institutions must be consistent across all subject areas in classifying either incoming or
outgoing exchange students as being eligible for funding, i.e. institutions should not count incoming students in some subject areas and outgoing students in others. To keep year to year comparisons valid, institutions must obtain SFC’s agreement before changing the method of counting. Requests to change the method of counting should be sent to HEdatareturns@sfc.ac.uk.

Students paying ‘Scottish’ tuition fees

200. Students who have been assessed as eligible to pay the tuition fee level applicable to Scottish students (‘Scottish’ fees) can be classified as eligible for funding. However, rest of UK students who are paying the same fees as Scottish taught postgraduate students are not eligible for funding. Also EU students who started on taught postgraduate courses from 2021-22 onwards and who are paying the same fees as Scottish students are not eligible for funding. An EU taught postgraduate student who is paying the same fees as Scottish students and who started their course prior to 2021-22 can be eligible for funding.

201. Students from the EU starting their courses from 2021-22 onwards will not in general be eligible to pay ‘Scottish’ fees and hence will not be eligible for funding. Students from the EU who started on their courses prior to 2021-22 and who are eligible to pay ‘Scottish’ fees can continue to be eligible for funding if they were previously classified as such.

202. New students from Ukraine who are treated the same as Scottish students for tuition fee purposes can be eligible for funding.

203. Annex A lists some specific types of student who can be eligible for ‘Scottish’ fees if they meet the relevant residence criteria.

Students domiciled in Scotland and students domiciled in the EU who started on their courses prior to 2021-22

204. If the concept of ‘Scottish’ fees does not apply e.g. courses provided in part-time mode, then students domiciled in Scotland can be classified as eligible for funding. In addition students domiciled in EU who started on their courses prior to 2021-22 can continue to be eligible for funding if they were previously classified as such. Students from the Channel Islands and the Isle of Man are not eligible for funding.

Access courses and summer schools

205. Students attending access courses and summer schools where successful completion guarantees a place on a course at higher education level can be classified as eligible for funding.
Students not eligible for funding

206. As well as those students whose courses are not eligible for funding, students with the following characteristics cannot be classified as being eligible for funding.

Students assessed as not eligible to pay ‘Scottish’ tuition fees

207. Students who are assessed as not being eligible for the same tuition fee level as Scottish students cannot be classified as being eligible for funding. This means students who pay the tuition fees for rest of UK students are not eligible for funding. Students who are eligible for rest of UK tuition fees are however counted against the intake targets and consolidation numbers for the controlled subjects. Annex B indicates some types of student who can be eligible for rest of UK tuition fees if they meet the relevant residence criteria.

208. Students from the EU who started on their courses from 2021-22 onwards will not in general be eligible to pay ‘Scottish’ fees. Also students paying tuition fees that are more than the standard fee level for full-time degree and HN students are not eligible for funding.

209. Rest of UK taught postgraduate students and EU students who started on taught postgraduate courses from 2021-22 onwards are not eligible for funding, even if they are paying the same tuition fees as Scottish students. However, rest of UK research postgraduate students can be eligible for funding. EU research postgraduate students who commenced their studies from 2021-22 onwards are not eligible for funding.

210. Scottish students who are paying fees set at a ‘cost-recovery’ level are not eligible for funding. For example, some Scottish students will pay tuition fees equivalent to those paid by international students.

211. Students whose places are funded by private sources are not eligible for funding if the places are ‘closed’ to other suitably qualified applicants.

212. Students whose places are funded wholly or partly from public sources other than SFC are not eligible for funding. These are students for whom an institution receives funding from other public sources that is more per FTE than the standard tuition fee. This relates to the funding of the place rather than to the payment of tuition fees. For example, if a Local Enterprise Company pays more than the normal tuition fee for some students then these students are not eligible for funding. However, if the LEC pays a standard tuition fee for some students then the students could be eligible for funding.

213. Students who are on a sabbatical year, or who are not in attendance for other reasons are not eligible for funding.

214. An institution cannot count an intercalating medical or dental student in its Early
Statistics return if the student is taking his/her intercalated degree at another institution.

215. In general an institution cannot return students of other institutions, whether in Scotland or not, such as those taking articulated courses, or franchised courses, or courses which are validated, but not taught, by the institution. One exception to this is that institutions should include the students whose places are supported by the additional funded places provided for articulation. These students should be counted in the Early Statistics Return even though they will be studying at a college for the first one or two years of their courses. Institutions collaborating in an Innovation Centre should agree amongst themselves which institutions count which of the taught postgraduate students in their Early Statistics returns.

Students studying outwith Scotland

216. Students studying for the whole of their course outwith Scotland are not eligible for funding. This is the case even if an institution sends some of its staff from Scotland to teach the students. An exception to this is if a prisoner who is ordinarily resident in Scotland but is having to serve his/her sentence elsewhere in the UK enrolls on a distance learning course with a Scottish institution.

217. If a student who is studying outside Scotland has to attend the institution for part of his/her course then the student has to spend eight consecutive course weeks at the institution in order to be able to be classified as eligible for funding. If the period of eight weeks or more is an optional part of the programme then the student will be eligible for funding only if he/she actually attends the institution for this length of time. In addition the student will only be eligible for funding from the reporting year in which he/she comes to Scotland onwards.

218. If a student is not classified as being eligible for funding because he or she is expected to be studying outside Scotland for the whole of his/her programme but then subsequently moves to Scotland then he/she can be classified as being eligible for funding after he/she has moved.

219. Postgraduate students who have completed the work of the course and are making no significant demand on their institutions’ resources but have yet to complete the requirements for the award are not eligible for funding.

220. Students who are only being assessed or examined this year and are making no additional demands on their institutions are not eligible for funding. This would include, for example, PhD students who have submitted their theses but have not yet taken their viva voce examinations, or students resitting assessments or examinations without attending their institutions.

221. Graduates of an institution and members of an institution’s staff who are working
towards higher doctorate level qualifications (e.g. DSc, DLitt, etc.), or professional qualifications, in cases involving little or no academic input from the institution are not eligible for funding.

222. The following categories of student are also not eligible for funding. There is further information on these types of student elsewhere in these notes of guidance:

- Students who withdraw from courses after a short period of time, generally less than five weeks, see paragraph 53.

- Students enrolled on a part-time course beyond the normal duration of the course, see paragraphs 246 and 247.

- Students spending an optional year away from the institution, unless they are either on an optional sandwich placement year, see paragraph 240, or on an optional year’s study abroad involving significant academic input from the institution and SFC agrees to their inclusion in this return, see paragraphs 243 and 244.
Section 7: Levels of Study for the Early Statistics Return

223. Student numbers are classed by level of provision into four general categories in the Early Statistics Return (research postgraduate, taught postgraduate, taught postgraduate with undergraduate fees and undergraduate), and these categories are described below.

224. Annex C, in the accompanying spreadsheet, describes how the ‘Qualification category’ (QUALCAT) field in the HESA Student Record is used to define the different levels of study.

Research postgraduate

225. This category covers postgraduates who are mainly engaged in research, whether or not they receive some formal teaching. In some institutions students enrolled for research degrees take some taught elements, such as courses in research methods. Institutions should return these students as research postgraduates.

226. Provision coded as ‘M0004’ (‘Taught masters degree designed specifically as a training in research methods and intended as a preparation for a research-based higher degree’) in the ‘Qualification category’ (QUALCAT) field in the HESA Student returns is classified as research postgraduate provision for the Early Statistics Return. HESA classify this provision as being at taught postgraduate level for their uses of the Student Record.

Taught postgraduate

227. This category covers postgraduates on courses which are mainly taught, including graduate certificates and diplomas, although they may require students to complete a dissertation.

228. Many Masters courses include an extensive taught element, followed by an individual project or dissertation. Notwithstanding this element of individual project work, institutions should return students on these courses as being taught postgraduates.

Taught postgraduate (undergraduate fees)

229. Provision within the Education and Built Environment subject areas include postgraduate courses funded on the basis that the tuition fees are at the same rate as for undergraduate students. This provision is classified as being at the taught postgraduate (undergraduate fees) level of study.

230. In the Education subject areas these are PGDE courses and some in-service and TQ(FE) courses, and in the Built Environment subject areas they are principally architecture courses.
Undergraduate

231. **This category covers all those students, other than postgraduates, eligible for inclusion in the Early Statistics Return.**

232. **This includes students taking undergraduate degrees, diplomas and certificates, HNDs, HNCs and other HE level courses not at postgraduate level.**
Section 8: Modes of Study and FTE Conversion Factors for the Early Statistics Return

233. Paragraphs 237 to 250 define and explain the modes of study used in table 1.

234. Paragraph 251 contains a table that explains how to calculate the FTE conversion factors for full-time and sandwich courses. Paragraphs 252 to 257 explain the calculation of the FTE for part-time students.

235. Paragraph 262 indicates the normal duration and credit rating of the majority of full-time higher education provision at Scottish HEIs, for use in deriving the FTE conversion factors for part-time courses.

236. Annex C, in the accompanying spreadsheet, indicates the fields in the HESA Student Record that are used to define the modes of study.

Full-time and sandwich courses

237. A full-time course, or research study, involves the student in an average of at least 21 hours study a week, including private study, for periods of more than 24 weeks per year or, in the final year, for 24 weeks or less if the earlier years met the definition of full-time. A short full-time course with an overall course length of 24 weeks or less is classed as part-time, see paragraph 249.

‘Thick’ sandwich courses

238. ‘Thick’ sandwich courses are full-time courses for which an obligatory placement causes continuous non-attendance for at least one academic year.

Courses with an obligatory year of study away

239. Many language courses, for example, will have a compulsory year abroad, and architecture courses will have a practical study year away from the institution.

An optional sandwich placement of at least one academic year

240. Some full-time courses have an optional sandwich placement of one academic year. In the earlier years of the course institutions might not know how many placements will be available, or how many students will choose to take up the placement.

A sandwich placement of less than one academic year

241. Treat full-time courses with a work placement of less than one academic year as full-time courses, as in paragraph 251, for the calculation of FTE, unless the programme
contains more than one such placement, see next paragraph.

More than one placement of less than one academic year, with the combined length of the placements being at least one academic year

242. Some courses have more than one placement. If the combined length of the placements is the equivalent of at least one academic year then, for the purposes of assigning FTEs only, the course is treated similarly to a course with one placement lasting at least an academic year, see table in paragraph 251.

An optional year’s study abroad

243. Some full-time courses involve an optional year’s study abroad, which may count towards the qualification awarded by an institution. For example, a degree course in engineering with French might give students the option of a year studying engineering at a French university, to count towards the degree awarded by the institution.

244. An institution should only count students who are on this type of year abroad in their Early Statistics return if the institution has a significant academic input to the year abroad. Institutions must obtain SFC’s agreement before including any of these students in their Early Statistics return. Requests to include students on an optional year’s study abroad should be sent to HEdatareturns@sfc.ac.uk.

Part-time courses

Types of part-time course

245. The Early Statistics Return does not require separate counts of students on structured part-time courses and students on other part-time courses. However, in deciding whether a part-time student is eligible for funding consideration has to be given as to whether or not the student is on a structured part-time course. A student on a structured part-time course who has been studying for longer than the normal duration of the course is not eligible for funding.

Structured part-time courses

246. Structured part-time provision covers all part-time courses for which students follow a structured programme of study, leading to a qualification in a subject that can be obtained by taking a full-time course, whether or not the reporting institution offers this type of full-time course. It is likely to include day release, block release, evening and distance learning courses.

247. A structured part-time programme of study is one with pre-set pathway(s) leading to the award. These specify the duration of the course and what students must do each
year to progress normally to the next year and, within the specified timescale, obtain the qualification. If a student is studying beyond the normal duration of the structured part-time course that student is not eligible for funding.

248. If there is no ‘normal’ duration for a part-time course or no ‘normal’ pathway(s) to obtaining the qualification, the course is not a structured part-time course.

249. There are two further types of provision that are classified as structured part-time:

- Short full-time. Students on full-time courses with an overall duration of 24 weeks or less.
- Postgraduate students still engaged in the work of the course, and supervised, but working away from the institution.

Other part-time courses

250. Other part-time provision covers all the part-time students eligible for inclusion in the return that are not enrolled on structured part-time courses. It is likely that most of the other part-time students would fall into one of the following categories:

- Students on part-time courses which do not lead to a qualification in the same subject that can be obtained by taking a full-time course.

- Students on part-time courses not involving a structured programme of study, including cases where students take a small number of individual modules, but not as part of a structured programme of study. For example, students taking various Higher National units on an individual basis in order to obtain an HNC or an HND after different and unpredictable numbers of years.

- Students who were formerly studying full-time but have returned to study part-time to repeat classes they failed in the previous year. Institutions should not include students who are only being assessed or examined this year and are, therefore, making no additional demands on the teaching departments.
FTE conversion factors by mode of study

FTE conversion factors for full-time and sandwich courses

(see paragraphs 237 to 244)

251. The normal conversion factors for full-time courses are shown in the table below:

<table>
<thead>
<tr>
<th>Full-time Category</th>
<th>FTE Conversion Factor</th>
</tr>
</thead>
<tbody>
<tr>
<td>For all student years</td>
<td>FTE = 1.0 - except as follows</td>
</tr>
<tr>
<td>‘Thick sandwich’ course</td>
<td>FTE = 0.9 for all years</td>
</tr>
<tr>
<td>Obligatory year away</td>
<td>FTE = 0.5 for the year away</td>
</tr>
<tr>
<td>Optional one year placement</td>
<td>FTE = 0.5 for the placement year</td>
</tr>
<tr>
<td>More than one work placement lasting less than one academic year, with the combined length of the work placements being at least one academic year</td>
<td>FTE = 0.5 for the total time spent away from the institution</td>
</tr>
<tr>
<td>Optional year study abroad</td>
<td>FTE = 0 unless agreed with SFC</td>
</tr>
<tr>
<td>Short final year</td>
<td>FTE = length of year / length of earlier years</td>
</tr>
</tbody>
</table>

FTE conversion factors for part-time courses

(see paragraphs 245 to 250)

252. Where possible, the FTE for a part-time student should be based on the proportion of credits enrolled for compared to an equivalent full-time course. For courses where there is no equivalent full-time course standard credit values should be used to calculate the FTE, see paragraph 262.

253. Short full-time courses, which are courses of 24 weeks or less, are classified as part-time. The FTEs for students on short full-time courses should also be returned using the direct proportion of credits enrolled for compared to an equivalent full-time course. If it is not possible to use credits to derive the FTE for short full-time students
then institutions can use the proportion of the academic year in attendance.

254. Eligible students studying part-time for one year to convert a postgraduate diploma to a Masters should be returned as 0.333 FTE in the Early Statistics Return.

255. For non-credit bearing activity that is eligible for funding (such as summer schools, access courses and research postgraduate provision) part-time FTEs should be returned on the following basis:

- In cases where there are other measures of credit for the course units, if one full-time year would normally consist of n such units, calculate the FTE as 1/n for each unit for which students are enrolled.

- Where no measures of credit rating are available, institutions should derive the FTE using their assessment of the student hours involved relative to the normal study load of a full-time student.

256. There are two exceptions to the calculation of part-time FTEs:

- Postgraduate students still engaged in the work of the course and being supervised but working away from their institution attract 0.5 FTE.

- Students studying beyond the normal duration of a structured part-time course are not eligible for funding.

257. For example, a student is studying part-time for a first degree and is studying for 40 credits during the session. A student studying full-time for a degree would normally study for 120 credits in a session. Thus the FTE to be returned for the part-time student would be 40/120 or 0.333. No FTE should be returned for a student who has been studying on a structured part-time course for longer than the normal duration of the course.

Non-standard FTE conversion factors

258. The full-time equivalent (FTE) conversion factors normally used will be those shown in paragraphs 251 to 257 above, but occasionally an institution may need to use a non-standard FTE conversion factor to ensure fair treatment. For example:

- A conversion factor greater than 1 may be right for an intensive full-time course that leads to a qualification in fewer years than normal.

- If an institution runs collaborative courses, it might be that the normal FTE conversion factors would not accurately reflect the proportion of attendance at the institution.

259. If an institution wishes to use a non-standard FTE conversion factor, the institution
should contact SFC with the details as soon as possible and certainly before finalising their Early Statistics return. Requests to use a non-standard FTE conversion factor should be sent to HEdatareturns@sfc.ac.uk.

260. Before agreeing the use of a non-standard FTE conversion factor with SFC, an institution should use the standard FTE conversion factor when filling in the return. Institutions should not request non-standard FTE conversion factors for courses which SFC has previously considered, unless there has been a change in the mode of study.

261. Institutions should use an agreed non-standard FTE conversion factor where pre-planned changes in the characteristics of a course (*) will take place during the session which will affect the students taking the course. For example, if an institution knows in advance that:

a) A sandwich course will have a ‘short’ final year, lasting say 10 weeks.

b) A course will change from full-time to part-time after half the session.

In these examples, (a) might require an FTE of 0.33 and (b) a factor of 0.75. The precise values would depend upon what the institution considers most realistic, given the circumstances of the particular courses involved.

(*) These adjustments are only for pre-planned changes in the characteristics of a course. For example, the prospectus or course documentation may specify that during the session the mode of study will change from full-time to part-time. Institutions need not attempt to identify individual students whose mode of study is expected to change during the academic session.
### Normal duration and credit rating by type of course

262. The list below indicates the normal duration and credit rating of the bulk of full-time higher education provision at Scottish HEIs.

<table>
<thead>
<tr>
<th>Type of course</th>
<th>Normal duration</th>
<th>Credits for whole course</th>
</tr>
</thead>
<tbody>
<tr>
<td>HNC</td>
<td>1 year</td>
<td>120</td>
</tr>
<tr>
<td>Certificate of HE</td>
<td>1 year</td>
<td>120</td>
</tr>
<tr>
<td>HND</td>
<td>2 years</td>
<td>240</td>
</tr>
<tr>
<td>Diploma of HE</td>
<td>2 years</td>
<td>240</td>
</tr>
<tr>
<td>Ordinary degree</td>
<td>3 years</td>
<td>360</td>
</tr>
<tr>
<td>Honours degree</td>
<td>4 years</td>
<td>480</td>
</tr>
<tr>
<td>Graduate certificate</td>
<td>1 year max.</td>
<td>60-90</td>
</tr>
<tr>
<td>Graduate diploma</td>
<td>1 year</td>
<td>120</td>
</tr>
<tr>
<td>Postgraduate certificate</td>
<td>1 year max.</td>
<td>60-120</td>
</tr>
<tr>
<td>Postgraduate diploma</td>
<td>1 year</td>
<td>120</td>
</tr>
<tr>
<td>Masters degree</td>
<td>1 year</td>
<td>180</td>
</tr>
<tr>
<td>Doctoral degree</td>
<td>3 years</td>
<td>540</td>
</tr>
</tbody>
</table>

263. The normal duration for some courses is longer than shown in the above table, for example, courses in medicine, dentistry and architecture.

264. Graduate certificates and diplomas are intended for graduates or equivalent. They complement the previous qualification, but the content may not relate directly to it and the studies and outcome are not at postgraduate level.

265. Postgraduate certificates and diplomas are also intended for graduates or equivalent. They build on the previous qualification, following on from it in subject and content, and the studies and outcome are at postgraduate level.
266. Institutions should use the list to calculate the FTE conversion factors for part-time provision, and for assessing whether a course is intensive and leads to the qualification in a shorter time than normal.

267. Institutions should also record in their Early Statistics return any eligible enrolments not covered by this list or these notes, including courses leading to recognised awards not listed.

268. Institutions should contact SFC, at HEdatareturns@sfc.ac.uk, if they are in any doubt as to the eligibility of or the correct FTE conversion factors to use for any of the courses which they provide.
Section 9: Subject Areas for the Early Statistics Return

Introduction

269. The subject information collected by SFC is the information required to monitor for under-enrolments against funded places and over-enrolments against consolidation student numbers, and to estimate tuition fee income associated with funded places. The subject information therefore varies according to level of study, as follows.

- **Research Postgraduates**
  No subject information is required.

- **Taught Postgraduates**
  **Controlled Subjects:**
  - Nursing and Midwifery Pre-registration.

  **Non-controlled Subjects (Combined)**

- **Taught Postgraduates at Undergraduate Fee Level**
  **Controlled Subjects:**
  - PGDE Primary: Core and New Routes.
  - PGDE Secondary: Core and New Route.
  - Other Taught Postgraduate Primary New Routes.
  - Other Taught Postgraduate Secondary New Routes.

  **Non-controlled Subjects (Combined)**

- **Undergraduates**
  **Controlled Subjects:**
  - Medicine: Pre-clinical and Clinical.
  - Scottish Graduate Entry Medicine: Pre-clinical and Clinical.
  - HCP-Med: Pre-clinical and Clinical.
  - Dentistry: Pre-clinical and Clinical.
  - Nursing and Midwifery Pre-registration Courses: Three-year and Four-year
  - Paramedic Education.
  - Prosthetics and Orthotics – Intake.
- Undergraduate Primary: Core and New Routes.
- Undergraduate Secondary.
- Combined Degrees in Education Primary: Core and New Routes.
- Combined Degrees in Education Secondary: Core and New Routes.
- Other Undergraduate Secondary New Routes.

Non-controlled subject areas:
- Pre-medical entry.
- Other STEM subjects (combined).
- Other subjects (combined).

Definition of subject areas

270. The subject information in the Early Statistics Return is based on the qualification subject(s) used for the HESA Student Return. The Higher Education Classification of Subjects (HECoS) is used to record qualification subjects in the HESA Student Return.

271. Annex C, in the accompanying spreadsheet, shows how the subject areas for the Early Statistics Return are defined in terms of HECoS and some of the other fields in the HESA Student Return, such as the qualification category. Annex C also indicates which subjects are classified as STEM subjects.

272. Annex C indicates which subject areas each institution’s new routes Initial Teacher Education courses should be counted under.

Actuarial Science

273. The HECoS subject code for ‘Actuarial Science’ (100106) indicates that this provision should be in the ‘Other (than STEM) subjects’ category. However, if an institution has sufficient justification for such provision to be recorded under the ‘STEM subjects’ category then the institution can do so. An example of this would be if all of the core modules for the course are mathematics-based except for one module in economics.

Initial Teacher Education Subjects

274. The full FTE of students taking PGDE courses should be allocated to the PGDE Primary and PGDE Secondary (core or new routes) subject areas as appropriate. These students should not be counted against the subjects that they are studying for a teaching qualification in.

275. The full FTE of students on courses leading to a Combined Degree in Education should be counted either against either the Combined Degree in Education Primary or
Secondary (core or new routes) subject areas.

**Intercalating medical and dental students**

276. An intercalating medical or dental student should be counted against the subject category in which they are taking their intercalated degree. An institution should only include an intercalating student in their Early Statistics return if the student is studying for his/her intercalated degree at that institution.

**Courses in Medicine and Dentistry**

277. Pre-clinical and clinical Medicine and Dentistry are in separate subject areas. Paragraphs 109 and 110 indicate which years of the medical courses are classified as being at the pre-clinical and clinical stages. Paragraph 118 indicates which years of the dentistry courses are classified as being at the pre-clinical and clinical stages.

**Undergraduate Courses in Combinations of Subjects**

278. The HESA Student Record allows up to five subjects to be recorded for a qualification along with the proportions associated with each subject. The following paragraphs describe how the FTE should be counted for undergraduate students on courses leading to a qualification in more than one subject.

279. Students on Initial Teacher Education (ITE) courses should be counted wholly against the relevant ITE subject area.

280. If an undergraduate student is studying for a qualification in a combination of subjects and all of the subjects belong to the same subject category (i.e. either all of the subjects are STEM subjects or all of the subjects are non-STEM subjects) then the student’s full FTE belongs under that subject category. For example the full FTE for a student studying for a joint degree in Physics and Chemistry would be counted against STEM as both are STEM subjects.

281. Undergraduate students who are not on ITE courses and whose qualification subjects include at least one STEM subject and at least one non-STEM subject should have their FTE apportioned over the two subject categories (STEM subjects and other subjects) according to the subject percentages for the subjects in each category.

282. For example, if a student was studying for a degree in Business Studies, French and Computer Science and the respective subject percentages were 50%, 20% and 30%. Then 30% of the student’s FTE would be counted against STEM subjects and 70% against other subjects as Computer Science is the only STEM subject out of these three subjects.
Some specific Types of Student Eligible for Funding

283. This annex lists some specific types of student who can be eligible for ‘Scottish’ tuition fees and hence could be eligible for funding. There are residence criteria that these students have to satisfy to be eligible for ‘Scottish’ fees and for some of these categories many of the students covered by the heading will not be eligible for ‘Scottish’ fees.

284. Details of the residence criteria that the student will have to satisfy to be eligible for ‘Scottish’ tuition fees is available on the website of the Student Awards Agency Scotland.

- Residence conditions for UK, EU, EEA and Swiss nationals CC.
- Residence conditions for nationals from outside the UK, EU, EEA and Switzerland CC.

285. Some of the following types of student can be eligible for ‘Scottish’ tuition fees and hence could be eligible for funding:

- EU, EEA and Swiss nationals and family members living in the UK by the end of 2020.
- Family members of a relevant person of Northern Ireland. (i)
- Irish nationals.
- UK nationals living in the EU/EEA or Switzerland.
- Dual UK/EU nationals.
- Children of Turkish workers.
- Children of Swiss nationals.
- Asylum seekers and those granted asylum in the UK.
- Iraqi nationals with Indefinite Leave to Enter (ILE) the UK.
- Syrian nationals with Humanitarian Protection in the UK.
- Afghan interpreters under the Locally Employed Staff (LES) scheme.
• Stateless Persons.

• People granted Discretionary Leave as a victim of modern slavery.

• Students satisfying ‘long residence’ criteria. (ii)

(i) A family member of a relevant person of Northern Ireland is defined as a person who would have leave to enter or remain in the UK by virtue of residence scheme immigration rules and would be regarded as being a person with protected rights if their parent was a person within the personal scope of Article 10 of the EU Withdrawal Agreement.

(ii) The Student Awards Agency for Scotland has a ‘long residence’ rule that allows the Agency to consider funding students who are not classed as being ‘settled’ in the UK for support purposes, where they have been lawfully resident in the UK for a significant part of their lives.
Annex B

Some specific types of Student Eligible for Rest of UK Tuition Fees

286. This annex lists some specific types of student who could be eligible to pay rest of UK tuition fees and hence could be counted against the intake targets and consolidation numbers for the controlled subjects.

287. There are residence criteria that these students have to satisfy to be eligible for rest of UK fees and for some of these categories most of the students covered by the heading will not be eligible for these fees. This annex does not list the relevant criteria but detailed information is available from the Student Awards Agency Scotland.

288. Some of the following types of student can be eligible for rest of UK tuition fees:

- Irish nationals.
- UK nationals living in the EU/EEA or Switzerland.
- UK/EU nationals living in Gibraltar.
Annex C

HESA fields relevant to returns and subject areas

289. Annex C is an accompanying spreadsheet.
