Dear Francesca,

PRE REGISTRATION NURSING AND MIDWIFERY UNDERGRADUATE EDUCATION

This letter is to advise the Scottish Funding Council (SFC) of the Scottish Government Health and Social Care Directorate's proposals on recommended intake targets for nursing and midwifery undergraduate programmes for academic year (AY) 2025-26.

Having considered all the factors involved, Scottish Ministers previously set a three year intake target for all pre-registration nursing and midwifery programmes for the period AY 2023-24 to AY 2025-26. The target for AY 2025-26 is 4,891 nursing and midwifery student places. The intake target is for students eligible for 'Home fee' status, rest of UK students and students from the Republic of Ireland. This is the final year of the previously negotiated period of three years, which was agreed to give stability to the Higher Education Institutions (HEIs) and take into account capacity of our Board partners to manage student placements.

As you will be aware, recruitment to controlled places on nursing and midwifery programmes remains challenging and for AY 2025-26 we have continued the approach started in AY 2024-25 where we worked with NHS Education for Scotland (NES), the Council of Deans Health (Scotland) and individual institutions to negotiate more realistic targets on which funding will be based. For ease, we have named the formal targets as "stretch" and the negotiated more realistic targets as "soft". HEIs will be funded on actual recruitment, based on SFC's data collection with funded places adjusted in-year to reflect actual recruitment.

Recommended intake targets, by HEI and fields of nursing and midwifery, are set out in the **Annex**. It is our continued expectation that HEIs should make every effort to recruit to the "soft" targets in this letter however if they are able to exceed those, they will be funded in full and not subject to clawback for over recruitment as we anticipate the "stretch" target is still unlikely to be met.

As in AY 2024-25 no intake target has been set for the discontinued Shortened Midwifery Programme at Edinburgh Napier University, however SFC should continue to fund eligible continuing students.

SFC would normally recover funds from HEIs who under-recruit eligible students against funded places by more than 3% and apply penalties to HEIs who exceed their consolidation number by more than 10%, subject to the consideration of any mitigating evidence presented by the university. As in AY 2024-25, SFC should monitor under-recruitment against the adjusted funded places, based on actual recruitment. Over recruitment at a 10% level is not expected but should that occur, we would not seek to apply a penalty.

Subject to discussions with the SFC over the calculation of the fundable student population and confirmation of the funding for AY 2025-26, we will transfer the appropriate level of funding required.

Scottish domiciled students should apply to the Student Awards Agency Scotland (SAAS) for their tuition fees, and the SFC should no longer fund nursing and midwifery at the gross teaching price. Continuing EU students and 'Home' students unable to access SAAS tuition fee support who commenced their studies in the 2020-21 academic year or earlier will continue to be funded by the SFC for both tuition fees and teaching grant until the completion of their programmes.

This letter is copied as per the copy list below. Please don't hesitate to contact me to discuss any aspect of this letter.

Yours sincerely

Rachael Dunk
Deputy Director
