Francesca Osowska  
Chief Executive  
Scottish Funding Council

07 April 2026

Dear Ms Osowska

## **PRE-REGISTRATION MASTER'S OPTOMETRY UNDERGRADUATE DEGREE**

This letter is to advise that Scottish Ministers have agreed, with respect to the Master's Optometry with Independent Prescribing (MOptom) undergraduate degree course, to: (i) support the proposed student intake numbers for Glasgow Caledonian University (GCU) for Academic Year (AY) 2026/27 and (ii) support the proposed student intake numbers for the University of the Highlands and Islands (UHI) for AY 2026/27.

### **GCU**

The recommended intake target for the next cohort of students to be admitted to GCU for the MOptom degree in AY 2026/27 (whether as a Year 1 student or as a student in a different Year of the degree under Advanced Standing arrangements) will be **60 Students Eligible For Funding (SEFF) and additionally GCU may recruit up to a maximum of 10 rest of UK (rUK) and International students.**

As has been previously agreed, the programme will be funded at the SFC's price group 2 for SEFF. The Scottish Government's Directorate for Primary Care (SGDPC) will transfer a per student amount equivalent to the difference between price group 2 and price group 3, with the exception that:

- 4 students enrolled in AY 2025/26 will be fully funded throughout the MOptom degree at Price Group 2 by SFC.
- 4 students enrolled in AY 2026/27 will be fully funded throughout the MOptom degree at Price Group 2 by SG.

SGDPC will transfer 62% of their agreed contribution of AY funding through the Autumn/Spring Budget Revision process for Financial Year (FY) 2026/27, with the balance to be transferred in FY 2027/28.

## UHI

The recommended intake target for the next cohort of students to be admitted to UHI for the MOptom degree in AY 2026/27 (whether as a Year 1 student or as a student in a different Year of the degree under Advanced Standing arrangements) will be **20 SEFF and additionally UHI may recruit up to a maximum of 10 rUK and International students.**

As has been previously agreed, the programme will be funded at the SFC's price group 2 for SEFF. SGDPC will transfer a per student amount equivalent to the difference between price group 5 and price group 3. SGDPC will transfer 62% of their agreed contribution of AY funding through the Autumn/Spring Budget Revision process for FY 2026/27, with the balance to be transferred in FY 2027/28.

### **Specific Conditions attached to the funding provided by SGDPC**

GCU and UHI must contract solely with Public Services Delivery Scotland (PSDS) in respect of the preparation and delivery of the Foundation Training Year (FTY), which comprises Year 5 of the MOptom degree.

In AY 2026/27 and thereafter, the SFC will model the required number of funded places for each new intake and for the continuing cohorts of eligible students. Subject to agreement over the number of funded places each year, SGDPC will transfer their agreed contribution of the funding for each financial year (the AY allocation will be split on a 62% / 38% basis).

The SFC should monitor the new MOptom degree through their annual Early and Final Statistics Returns, collecting information on both the annual intake and total number of students enrolled on the programme.

The SFC should recover funds for under-recruitment against funded student places and impose a penalty for over-recruitment against the consolidation number in a similar manner to that used for the controlled subjects of medicine, dentistry, and pre-registration paramedics, nursing and midwifery. In doing so, the SFC should recover funds from GCU and UHI if they under-recruit eligible students against funded places by more than 3% and apply penalties if GCU and UHI exceed their consolidation number by more than 10%. These percentages will be reviewed and determined on an annual basis.

The recommended intake in this letter is for SEFF. Whilst GCU and UHI are at liberty to accept rUK and International students, this number is capped at a combined total of 10 for each university. GCU and UHI must discuss and obtain agreement from SGDPC for any potential recruitment above the intake cap which, if agreed, is likely to incur a percentage reimbursement of fees. The SFC should not provide funded places for ineligible students.

In respect of International students, GCU and UHI will have to pay to PSDS the sum of £15K per student prior to the start of the Foundation Training Year. This will apply to International students who enrol in AY 2026/27 (and who therefore undertake their FTY in 2030/31) and to any who enrol thereafter.

This cost will be revisited annually and advised to the Higher Education Institutions at the same time as the controlled student intake numbers.

We would like this to be included in the letter to be sent from the SFC to the universities.

I would be grateful if the SFC would now make the necessary arrangements for the 2026/27 Year 1 intake, including to continue to work closely with SGDPC officials and those within the Scottish Government's Directorate for Lifelong Learning and Skills.

For future years, modelling will need to be carried out to ensure that workforce planning requirements are taken into account.

This letter is copied to the Scottish Government's Director for Primary Care, Director General Health and Social Care and Director for Lifelong Learning and Skills, as well as GCU, UHI, PSDS and Student Awards Agency Scotland.

Yours sincerely,

Karen Mowat  
Senior Policy Manager  
Scottish Government Primary Care Optometry Team
